FileMaker Pro 16 (\$317)
https://www.bhphotovideo.com/bnh/controller/home?A=details&O=&Q=&ap=y&c3api=1876%2C%7Bcreative%7D%2C%7Bkeyword%7D&gclid=EAIaIQobChMIIsYHUrpD91gIVDQaGCh0P7AduEAYYASABEgIh6vD_BwE&is=REG&m=Y&sku=1344149

FileMaker Pro is a database system used to design and create mobile data capture applications for field use. Applications are created on the desktop through Filemaker Pro and then deployed to an iOS mobile system (i.e. iPhone or iPad) through FileMaker Go. The data captured is then transferred back to the desktop as a CSV or PDF files, typically through e-mail or iTunes interface. There have been a number of sites in Region 2 where custom applications were created and employed to streamline field data capture, including Woodbrook Road, Puerto Rico Battery, Raritan Bay, Birchly Court, Niagara Falls Blvd, Holy Trinity Cemetery, Wurtsboro Lead Mine, and most recently Morgan Materials. At these sites, applications developed through FileMaker Pro greatly enhanced data deliverables (through reduction of transcription errors and quality of end product) as well as streamlined field operations (resulting in project cost savings). Applications developed (by OSC Peter Lisichenko) include soil classification and sample management tools, XRF data capture, and a container inventory system. The continued use of FileMaker Pro software by OSC Lisichenko will be for continued software support of existing applications and for the development of new applications as project needs develop.
